

JPN888

Premium Near Edge
Wax/Resin

Technical Data Sheet

Product Description

The JPN888 is a near edge wax/resin ribbon specifically designed for the food packaging industry. Coated on to a 4-micron base film, this ribbon delivers exceptional transfer sensitivity, high image quality on diverse substrates, and remarkable smear and scratch resistance. Engineered with a print speed of up to 30 inches per second (IPS) and enhanced resistance – including scratch/smudge, UV, and solvent resistance – the JPN888 ensures both efficiency and reliability.

Applications

Food &
Beverage

Inventory &
Logistics

Retail

Recommended Substrates

Paper

- ✓ Coated Paper
- ✓ Glossy Paper

✓ Synthetic Paper

Synthetics

- ✓ Polyethylene
- ✓ Polypropylene
- ✓ Polyester

Specialty Materials

- ✓ Nylon

Performance Characteristics

- ✓ Halogen & SVHC-Free
- ✓ Outstanding transfer sensitivity
- ✓ Perfect for both rough and smooth stocks
- ✓ Excellent UV resistance level
- ✓ Extremely fast print speeds up to 30 IPS
- ✓ Remarkable image density (Konica Minolta FD-5) ranging from A to A+
- ✓ Superior abrasion resistance

RIBBON PROPERTIES

Description	Result	Test Method
Ink	Wax Resin	
Color	Black	Visual
Total Thickness	6.0 ± 0.3μ	Micrometer
Base Film Thickness	4.0 ± 0.3μ	Micrometer

DURABILITY OF PRINTED IMAGE

Description	Result	Test Method
Print Density	> 1.80	Spectro-Densitometer
Scratch/Smudge Resistance	3.5 (ANSI)	Pressure: 1.96x10 ⁴ Pa Stroke Cycle: 3000 cycles with corrugated paper

*American National Standard Institute (ANSI) Grade Levels A, B, C, D, and F, where A is excellent, B is above average, C is average, D is below average, and F is poor.

The information on this data sheet was obtained in laboratories. Measured values may vary slightly when tested in a different environment. Information contained within this document is subject to change without notification.
